ASPIRA North Campus Construction Program

ASPIRA is engaged in creating an educational environment that will produce positive outcomes by raising FCAT scores, improving student achievement, increasing school attendance, improving student behavior, and promoting parental involvement for our students and their families.

ASPIRA of Florida, Inc., is seeking financing for three charter school facility construction programs in Miami-Dade County, Florida. This plan will increase ASPIRA's capacity to serve an additional 900 middle school students yearly, raising enrollment to 1,800 students. Upon completing all construction phases, the three community education campuses will triple ASPIRA's square footage to over 155,000

SF with nearly 6 acres of prime South Florida Miami-Dade County real estate.

ASPIRA efforts are made possible by the vision and hard work of the staff and through the policies of Board of Directors, currently chaired by Dr. Victor Vazquez Hernandez, Miami-Dade College History Professor and author of *The Puerto Rican Diaspora*. ram2008-01
